

EVENT STANDS R+

OLAN – YOUR RELIABLE SCAFFOLDING SUPPLIER

2006

Founded by a synergy of Polish, Lithuanian and Norwegian entrepreneurs, we were focused on providing high quality scaffolding to local and foreign markets right from the beginning

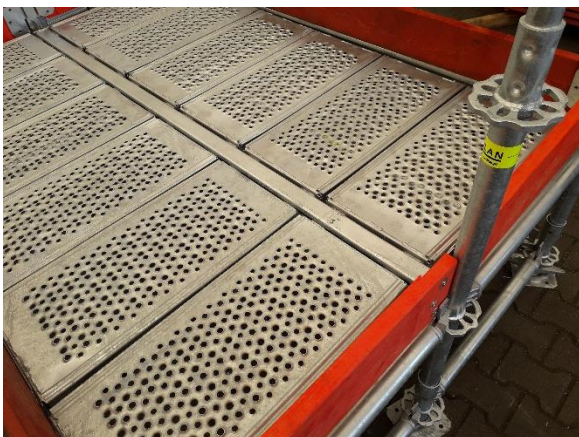

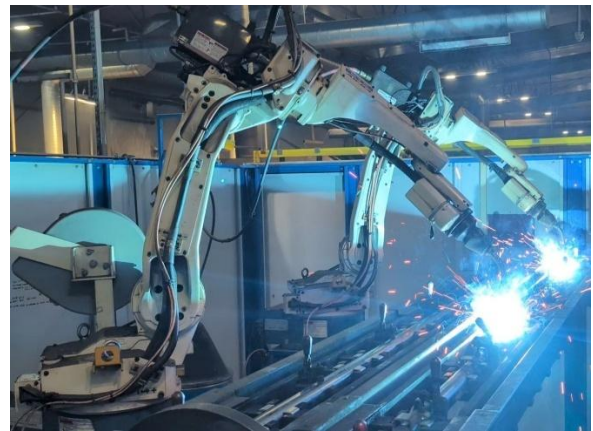

2012

OLAN moved to a newly built manufacturing facility in Żabokliki, Siedlce in Poland. Integration of new profiling, welding and assembly technologies allowed us to reach new heights

TODAY

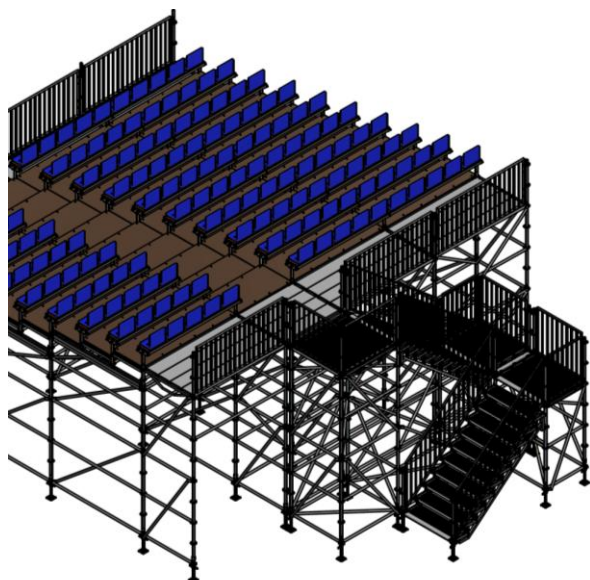

We offer three scaffolding systems that are produced in both steel and aluminium. These are modular scaffolding R+, façade scaffolding EURO+ and Scandinavian type FOX. In addition, we supply temporary roofs, formwork and supporting modular towers, as well as temporary stand systems and masts

EVENT STANDS OLAN R+

The temporary event stand system is based on OLAN R+ modular scaffolding components, complemented by dedicated elements that complete the structure.

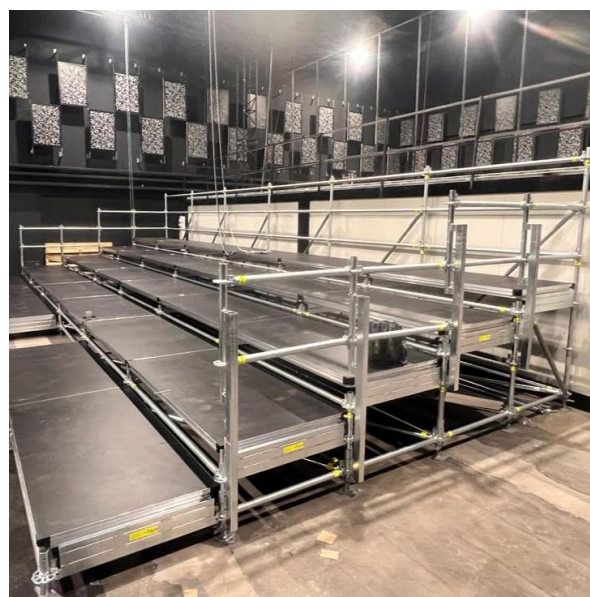

This catalogue presents dedicated elements designed to complement the OLAN R+ modular scaffolding system. For detailed information on the modular scaffolding components, please refer to the R+ catalogue.

To guarantee top performance and reliability, we invest heavily in prototyping and testing, using only premium-grade steel and aluminium materials. Precision manufacturing with CNC technology ensures exact dimensional accuracy, while EN 1090-certified welding provides superior structural integrity.

The stand design is highly flexible and easily reconfigurable, allowing levels to be added or removed, the overall height to be increased, and optional roof structures to be installed above the stand.

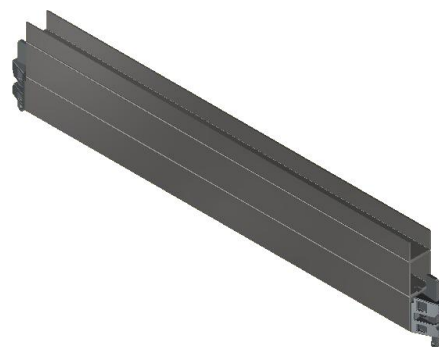

Our technical team will be pleased to assist you in selecting and assembling the most suitable configuration for your project.

EVENT TRANSON

Made of steel with wedge connection heads is a heavy-duty solution to handle event decks.

Article Nr.	Dimensions (m)	Weight (kg)
RSR-80086	0,86	11,0
RNS-80257	2,57	31,7

GUARDRAIL POST

Attached with wedge heads on standards. Guardrails could be hung on rosette or universal

Article Nr.	Dimensions (m)	Weight (kg)
RSR-86164	1,64	13,5
RSR-86170	1,70	11,7

EVENT DECK

Aluminium frame deck with plywood floor. Deck is hung on u-hooks, allowing to utilize standard u-transom.

*placed on top of event transom

Article Nr.	Dimensions (m)	Weight (kg)
RSR-88157	1,57 x 0,86	26,8
RSR-88257	2,57 x 0,86	42,4

GUARDRAIL

Side protection for stages and podiums. Standard height is 1,10m

Article Nr.	Dimensions (m)	Weight (kg)
RSR-87157	1,57	20,0
RSR-87207	2,07	25,4
RSR-87257	2,57	30,1

STAIRWAY BEAM

In addition to standardized stairway beams, we produce sizes according to your requests.

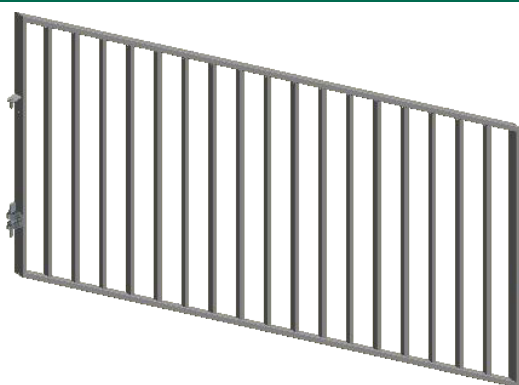

Article Nr.	Dimensions (m)	Weight (kg)
RSR-89100	1,57 x 1,00	18,2
RSR-89257-9	2,57 x 1,50	28,4
RSR-89257-10	2,57 x 1,50	28,7

STAIRWAY GUARDRAIL

Grated guardrails adapted to the use on stairways.

Article Nr.	Dimensions (m)	Weight (kg)
RSR-87010	1,57 x 1,00	22,5
RSR-87011	2,57 x 1,50	30,5

STAND BEAM

Given beam is used to assemble stand levels. Adapted for various types of platforms: stage, steel or aluminium decks.

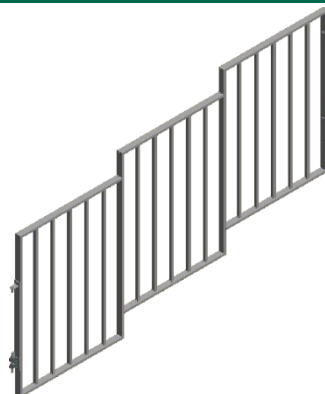

Article Nr.	Dimensions (m)	Weight (kg)
RSR-82257T	1,72 x 0,40	14,5

STAND GUARDRAIL

Grated guardrails adapted to the use on the sides of temporary stands.

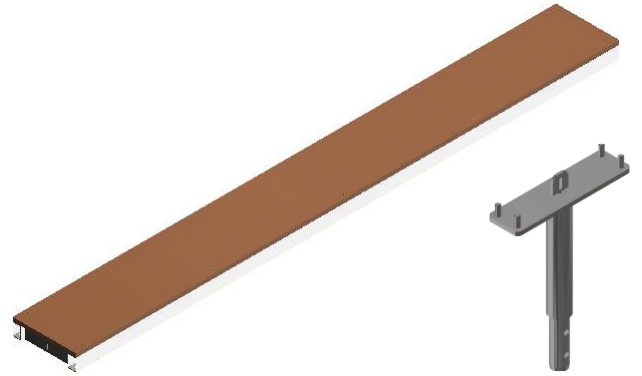

Article Nr.	Dimensions (m)	Weight (kg)
RSR-87001	2,57 x 1,10	34,1

STAND BENCH

A seating element for tribunes. Plastic chairs can be mounted on top of the stand bench.

Article Nr.	Dimensions (m)	Weight (kg)
RSR-84157	1,57 x 0,30	10,6
RSR-84207	2,07 x 0,30	13,8
RSR-84257	2,57 x 0,30	16,8
RSR-80001	0,38	3,5

ONE SYSTEM FOR MANY CONFIGURATIONS

With standardized OLAN elements we can design stands according to your needs – dimensions, available space or required quantity of observers.
